

EduFlow — Student, Group & Assignment Management System

Candidate: Harsh

Task: Joineazy Full Stack Intern Technical Task — Built as EduFlow (Version 2.0 — MVP-Scoped Edition)

Date: 17 September 2026

1. GITHUB REPOSITORY LINK

<https://github.com/Harsh9945/Assignment-Management>

Public repository containing the full React + Tailwind CSS frontend, Express.js backend, PostgreSQL 16 database, Docker Compose orchestration, 4 Jest test suites (40 passed tests), and comprehensive architecture documentation.

2. WORKING DEMO VIDEO LINK

https://docs.google.com/videos/d/1YdAss1jBlbQwVyy_F1SqADuhoKc7YiaQC6XdWjaYZp0/p/lay?usp=sharing

Walkthrough demonstrating Docker Compose setup, login, past-due badge flagging, two-step confirmation modal, live group progress update (75% to 100%), and the professor analytics dashboard.

3. LIVE PLATFORM LINK (OPTIONAL)

Local Evaluation: <http://localhost:3000>

Ready for instant single-command evaluation via Docker Compose (Frontend on port 3000, Backend API on port 5000, PostgreSQL on port 5432).
